# Dynamics Shipping Connector (DSC)

Simplified and seamless fulfillment of shipping orders

Developed as an add-on to Microsft Dynamics 365 for Finance and Operations, DSC enables users to efficiently manage the end-to-end shipping process. It integrates with the existing order to achieve seamless order fulfillment. With DSC, companies from manufacturing and distribution industries can see great improvements in their operations and supply chain functions.

DSC allows users to choose from multiple shipping providers, validate the shipment address implicitly on payment, request the shipment to the provider, and update the order with the shipment tracking details in Dynamics 365.

With DSC, users can manage shipments directly from Dynamics 365 without the need of any third party shipping provider platform effectively, saving both time and cost.
