We partnered with Synoptek as our MSP. One of the initial projects we needed was to migrate our collocated datacentre to an Azure tenant. Synoptek's knowledgeable and experienced staff made a complex transition a success while reducing our overall compute and backup spend. We continue to partner Synoptek utilizing and relying on their cloud services team to manage, monitor and recommend changes not only to increase performance, security, and reliability, but also for cost reductions and savings. The relationship has been a benefit, and I wholly recommend them.

- CIO, An engineering, IT and staffing services agency

From day one, the most important aspect of our relationship with Synoptek has been reliability and peace of mind. We have never had a major failure at any of our data centers. And when you are providing services like ours that is so mission-critical, that's what matters. Perfection is the minimum level of performance. We want to be with a partner we know can provide us with perfection, and that's what Synoptek does. They are excellent at what they do

- CEO, Healthcare technology solutions provider

Stay in control of costs, security, and GRC (Governance, Risk, and Compliance) at every step to the cloud. [Schedule](#) your Cloud Readiness Assessment today!
