Artificial Intelligence

In the current digital landscape, Artificial Intelligence (AI) is becoming a transformative force, reshaping businesses, entire industries, and everyday experiences. Enterprises equipped with robust data and AI frameworks are the ones propelling innovation, competitive edge, and operational excellence. As new trends around Generative AI (GenAI), Deep Learning, and Large Language Models (LLMs) continuously evolve, organizations across sectors are exploring new AI use cases.

At Synoptek, we recognize AI's role in overcoming daily encounters and transforming business outcomes. Whether you find it difficult to analyze the growing volumes of data, forecast demand, detect fraud, or enhance operational efficiency, our tailored suite of AI Services can overcome these challenges and help you achieve your business objectives.

Synoptek guides businesses in transitioning from curiosity about AI to actual implementation and tangible value, doing so ethically with well-defined business objectives.

Benefits of AI

- Personalized experience
- Efficient content generation

The AI Process Lifecycle we Follow

Why Partner with Synoptek for AI?

As a technology consulting provider with an unprecedented focus on infusing data and AI across its offerings, Synoptek enables clients to build a robust AI foundation. We offer a tailored mix of services for customers across various industries and domains like Manufacturing, Healthcare, Financial Services, Higher Education, Non-profit, Retail, and Oil, Gas, and Energy.

- Certified AI team
- Skilled data scientists and researchers trained on the latest AI tech stack
- Cloud-native deployment capabilities
- Data-led transformation
- Scalable, responsible, and highly resilient AI solutions

Our Experience

01

IT Ticket Issue Recommendation System

An AI system that analyzes input keywords to recommend five relevant previously occurring tickets.

02

Role-Based Solutions for Knowledge & Document Q&A

A document Q&A system with real-time updates, role-based access, and a user-friendly interface

03

Tailored Email Responses with Generative AI and D365

An AI system that streamlines email management and enhances efficiency with real-time updates.

04

LinkedIn Profile Summarizer

An AI tool that analyzes names, provides LinkedIn profile summaries, and answers user queries for comprehensive insights.

05

Generating Dental Prognosis Plan

An AI system that leverages patient history and symptoms to craft personalized prognosis plans and prescribed medications.

06

Product Description Generator

An AI solution that processes images and user-defined criteria to generate detailed product descriptions.

We have enjoyed working with you the past several months and we appreciate your hard work on the AI-based pricing algorithm.
